RECORDS ADMINISTRATION PROGRAM

FIRST QUARTER REPORT

1 April 1968

ACCOMPLISHMENTS

RECORDS CREATION

(Forms Control, Correspondence Improvements, and Reports Management)

A. Forms Management Actions Completed this Quarter:

New Forms Designed and Issued	47	(336,500 copies)
Old Forms Revised and Issued	77	(4,958,870 copies)
Old Forms Obsolete and Removed	15	

B. Other Forms Developments:

1. During a recent trip to the Records Center to update the Vital Records file of Agency forms we discovered more than 400 forms were missing. The printer had not included Forms Management in the original distribution. To correct this, the respective Records Officers will be contacted for the missing forms. Two days were spent in this review and updating exercise.

RECORDS MAINTENANCE

(Records Surveys, Systems Development, Equipment and Supplies)

A. DDS&T

The Office of Logistics installation of Fullspace (compacting type shelving) released four sections of conventional shelving which we transferred to meet a need in Office of Research and Development, DDS&T, thereby saving 54 square feet of floor space. This resulted in a cost avoidance of approximately \$420.

B. DD/I

A Survey is being made of the microfilming feasibility to reduce storage space at Headquarters and the Records Center for filing the Photo Caption Reports of CRS/GR. Since these reports are scheduled to be held fifty years, filming may prove to be an economically appropriate consideration. There are 124 cubic feet at the Records Center and 18 cubic feet at Headquarters.

C. DD/P

Mr. [] of RID and Mr. [] of this Staff examined the first trial installation of motorized Fullspace shelving. They were impressed with the ease and speed with which this equipment operates. The 1/4 horse-power motor can move 45,000 pounds of files to open an aisle in 10 seconds. The item is not priced yet and we felt an additional safety control is necessary.

D. DD/S

1. The installation of Conserv-a-File V in the Office of Personnel, Recruitment Division has been completed. In addition to saving 54 square feet of floor space, it permits easier access to the files, reduces search time, and in general, increases productivity. This Office previously used "Pro-File" cabinets. It is our hope their main file room will now convert to this type of equipment, as we have urged them for years in several proposals to increase their filing capacity and efficiency.
2. The installation of Fullspace in Office of Logistics, Supply Division has been completed and is working very satisfactorily.

VITAL RECORDS

(Storage of Data for Emergency or to Reconstitute Destroyed Offices)

CURRENT ACTIVITIES

FORMS

1. We are currently revising our internal office procedures involved in the design, maintenance, control, and disposition of forms.
2. A dispatch from [] informed us of new procedure for stockpiling forms used in the EE area. Forms previously held in the field now will be stockpiled at Headquarters for issue to the individual stations.
- ✓ 3. We were advised that due to a scarcity of funds future requests for commercial and GPO printing must be based on a 6-month supply instead of our present 12 to 18 month cycle. Because of the usual 3-month shipping time we will be forced to reorder very soon after the orders arrive.

25X1A6A

EQUIPMENT

1. We are meeting with representatives of the Office of Communications on using Fullspace [] for storage of supplies and equipment. This application is similar to our installation in Printing Services last year. We arranged for representatives to view the PSD equipment.
- ✓ 2. Completed a study for Mr. [] Office of Finance, regarding use of Conserv-a-File V. Use of this type equipment would save approximately 45% of the floor space now in use. A detailed proposal, including cost, has been given to []
